

ASAD QAYYUM

Full Stack Webiste Developer

Karor Lal Esan, Layyah | i.am.asad586@gmail.com | asadqayyum.netlify.app

SUMMARY

Web Developer focused on creating dynamic and responsive web applications using modern technologies. Skilled in full-stack development, UI/UX principles, and building production-ready apps for real-world use. Adept at solving complex problems and delivering client-focused solutions.

AREA OF EXPERTISE

- Languages & Frameworks: HTML5 · CSS3 · JavaScript · TypeScript · React · Next.js · Tailwind CSS
- Backend & Database: Node.js · Express.js · MongoDB
- Version Control: Git
- Other: Responsive Design · UI/UX Design

KEY ACHIEVEMENTS

- Client Project Delivery: Successfully built and delivered two full-stack applications, significantly improving client workflows and online presence.
- Modern Tech Stack: Leveraged advanced technologies including React, Tailwind, Next.js, and MongoDB for performance and scalability.

PROFESSIONAL PROJECTS

- **Blogging Website with Authentication**
Developed a secure blogging platform with user registration/login system. Created an admin dashboard for blog post management (add/edit/delete), user roles, and featured content. Added blog categories, comment section, profile editing, and analytics tools.
- **E-Commerce Website with Admin Panel**
Built a full-featured shopping site with user authentication, product search/filter, cart, and order placement. Designed an admin panel to manage products (CRUD), track order history, and add blog content.
